EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS

Kanban Board — A kanban board is a tool that can be used to manage work at a personal or organizational level. It visually depicts work at various stages of a process using cards to represent work items and columns to represent each stage of the process. It is a responsive web app built using the mobile first approach.
- Built with: React & Redux

IP Address Tracker — A web app that displays info of a public IP address and its location on a map, on first load the user's public IP address is used. The user can search other IP addresses with the search bar. 2 different API-s are used to get the data.
- Built with: JavaScript, HTML5, CSS3.

Tesla Car Rental — A full-stack app built in a team of 4. The user must register to use the app, he can reserve a car and see the details of a car. The admin can also add or remove cars.
- Built with: React & Redux, Ruby on Rails

SALES LAUNCH   Remote
Web Developer (Part- Time)   December, 2022 – Present
